SANAKYAN S

Chennai, India **sanakyan2004@gmail.com** **+91 7604930970** **linkedin.com/in/sanakyan-s**

Professional Summary

Software Engineer Apprentice at Fidelity Investments building enterprise full-stack applications with **Angular, TypeScript, Python (Flask), Pandas and PostgreSQL**, secured with **Azure AD** authentication. Experienced across the **software development lifecycle** in Agile teams: requirements, design, coding, defect resolution and deployment support. Adds applied **AI/ML** depth through a real-time computer vision project (Python, OpenCV), LLM and prompt-engineering skills, RAG fundamentals and AI-assisted coding for clean, well-documented code. B.Tech in Information Technology with strong data structures, algorithms and OOP fundamentals.

Technical Skills

Languages: **Python, TypeScript (Intermediate), JavaScript (Intermediate), SQL (Intermediate), Java (Basics)**
Frontend: **Angular 14, React.js (Learning), HTML5, CSS3, Bootstrap**
Backend & Databases: **Flask, REST APIs (Intermediate), PostgreSQL (Intermediate), Pandas, Node.js (Basics)**
AI / ML & Data: **AI-Assisted Coding, LLM Fundamentals, Prompt Engineering, RAG (Basics), NLP Fundamentals, Scikit-learn, NumPy, OpenCV (Basics), Model Evaluation**
Cloud & Security: **Microsoft Azure (Basics), Azure AD, Azure AI Foundry SDK, AWS (Learning)**
Tools & Practices: **Git, GitHub, Docker (Basics), VS Code, Linux, CI/CD (Jenkins Basics), SDLC, Agile, Code Reviews, Technical Documentation**
Mainframe: **SDSF, ISPF, HMC, CICS, TSO, JCL (Basics), VSAM (Basics)**
Core Concepts: **Data Structures & Algorithms (Basics), Object-Oriented Programming (OOP)**
Spoken Languages: **English, Tamil**

Professional Experience

Software Engineer - Apprentice, Fidelity Investments, Chennai **Feb 2026 - Present**
Mainframe Tech Window Planning & Orchestration Portal | Angular 14, TypeScript, Flask, PostgreSQL, Pandas, Azure AD

- Develop and enhance features of an enterprise full-stack portal used to plan mainframe change and migration timelines.
- Contributed to a Python/Pandas timeline rebuild engine that preserves user edits, tracks changes and maintains audit history for migration timelines.
- Built spreadsheet-style planning grids with rich-text formatting, JSON persistence and record locking to enable collaborative change planning.
- Integrated Azure AD authentication to secure access to the application and its data.
- Troubleshoot and resolve defects, support production and non-production environments, and deliver enhancements with senior engineers and cross-functional teams.
- Applied mainframe change-management knowledge from KT sessions to application enhancements.

Junior Software Developer Intern, Causeve, Chennai (Hybrid) **Oct 2024 - Feb 2025**

- Designed, developed and deployed the corporate website for **R.K. Pharma**, a Singapore-based pharmaceutical distributor, with responsive HTML, CSS and JavaScript across home, about, products and blog pages.
- Integrated third-party libraries for rich-text editing and code syntax highlighting, a key feature requested by users.
- Built new features and enhanced existing software in an Agile team through weekly sprints and code reviews.

Frontend Developer Intern, All India Translink, Chennai (Remote) **Feb 2024 - Apr 2024**

- Built responsive UI components with HTML, CSS, Bootstrap and JavaScript, improving cross-browser compatibility.
- Collaborated with a remote team using Git for version control and shared workflows.

Projects

AI Doctor Bot Assistant (Generative AI Medical Assistant) | Python, LLMs, Prompt Engineering

- Designed and built an interactive LLM-based assistant that answers medical queries and provides health-related information, using Python to structure user inputs and process model responses.
- Engineered system prompts and context-setting techniques for safe, accurate, structured responses, with guardrails that handle edge cases and advise users to consult medical professionals in emergencies.

Intelligent Helmet Detection for Bike Speedometer Integration | Python, OpenCV, Machine Learning

- Developed a computer vision system that classifies riders as helmeted or non-helmeted, using OpenCV preprocessing and a classification pipeline.
- Implemented real-time video-frame processing from camera input and explored neural-network approaches to improve detection.
- Designed the solution to integrate with a bike speedometer, enabling safety-related actions based on detection results.

Student Dropout Analysis | Smart India Hackathon 2023 (Internal)

- Proposed a data-driven approach to identify patterns and factors behind student dropout, to support education policy decisions.

Education

B.Tech, Information Technology **Aug 2021 - May 2025**
Vels Institute of Science, Technology and Advanced Studies | CGPA: 7.96 / 10

Higher Secondary Education **Jun 2020 - May 2021**
St. Paul's Mahajana Higher Secondary School | 83.3%

Certifications

Develop an AI with the Azure AI Foundry SDK (Microsoft) | Prompt Engineering, Vanderbilt University (Coursera) | Software Engineering (Coursera) | Full Stack Development (Imarticus) | How to Build Chatbots (IBM) | Agentic AI (Udemy, In Progress)
